Title: NASCAR '15 Chevrolet Pack 1

Genre: Racing

Developer:

Eutechnyx

Publisher:

Dusenberry Martin Racing

Release Date: 4 Jul, 2015

a09c17d780

Minimum:

OS: Windows XP

Processor: AMD Athlon 64 X2 6000 (2*3000 MHz)

Memory: 2048 MB RAM

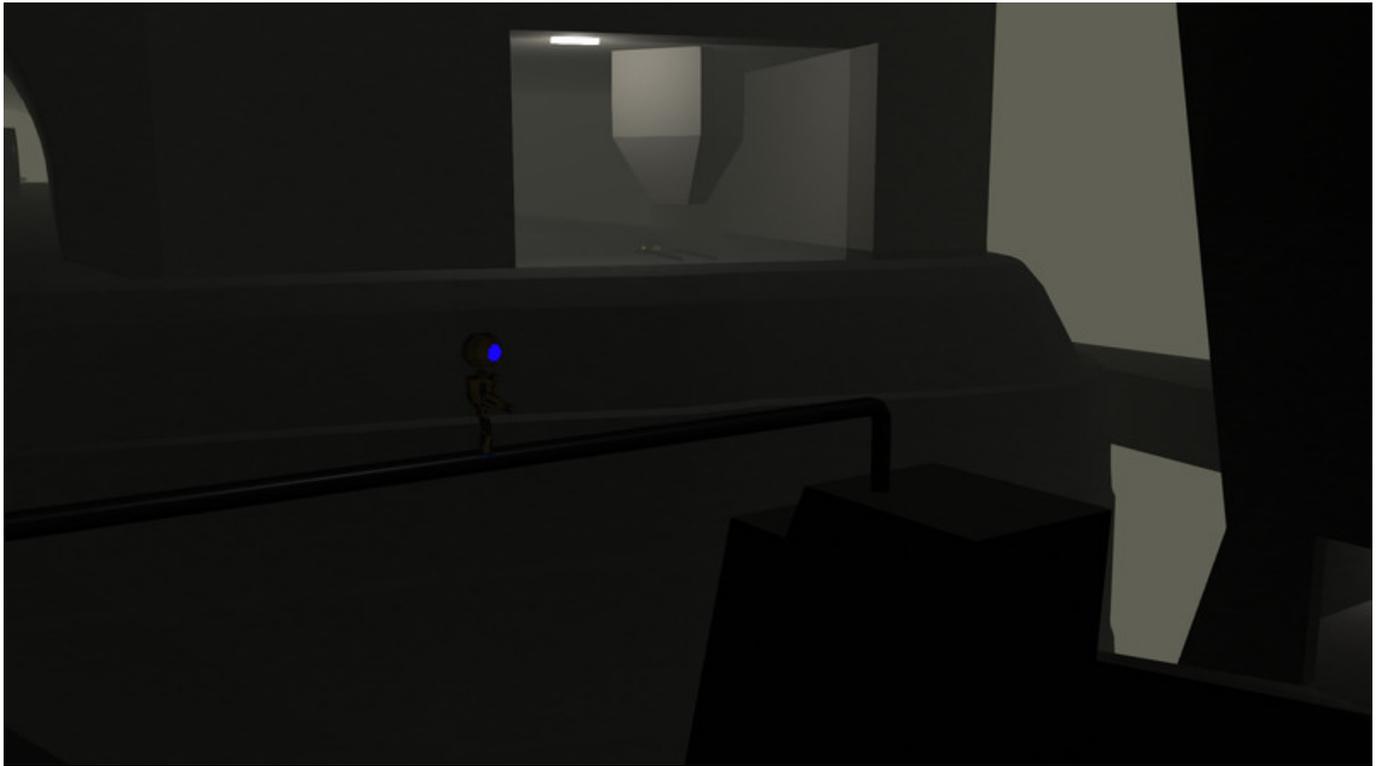

Graphics: GeForce 8800 GT

DirectX: Version 9.0

Storage: 7 GB available space

English

First impressions: <http://www.cublikefoot.com/girls-like-robots-first-impressions/>

Girls Like Robots is a nice, casual logic puzzle game. It's very obvious that it's a mobile port, but it doesn't actually play that bad on PC.

The game itself is very funny and completely unrealistic. Girls like robots, girls dislike nerds, nerds like edges, etc. Very simple gameplay, easy to pick up on, especially considering the game holds your hand throughout the first several levels. The art style is very quirky and colorful, along with the smooth animations.

The game does have a slight story to it, in the form of various cutscenes scattered in between levels. It's a ridiculously simple story, nothing fantastic, but it is rare to see any type of story in a puzzle game like this, so props for that. The story doesn't really make much sense logically, but neither does the game, so that's okay! The game's soundtrack is quite repetitive, however.

The puzzles were (for me) quite easy to follow. It gets progressively more difficult, but not so difficult as to prevent progression on my part. It really depends on how much thought you put into each puzzle before acting, as it is a logic puzzle game. The game has a high replayability if you're a completionist. Each level can be perfected, if you know what to do, and it would take quite some time to do so, hence the increased replayability.

Overall, Girls Like Robots is a fantastic little game. It's a pleasure to play, even on PC, although I can only see myself playing this on mobile instead of Steam in the future. The pricetag is set at \$7, which may be a bit high for a game of this scale, so try to pick it up during a sale if you're interested.. This game is absolutely hilarious if you like soccer and want to have a good laugh and score some insanely stupid goals 10V10. Really good for a free game. I definitely recommend for those who like football manager but don't have enough money. Not as detailed as Football Manager but it's good enough. +Nana nana nana nana nana +Catwoman looked great even in the '60s

-No Adam West Batman. This game is so bad, i \u2665\u2665\u2665\u2665ing hate it so much. The game controlling in general runs like complete \u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665. The game is pretty much a clone of super meat boy, but ranked up to nearly impossible with some of the \u2665\u2665\u2665\u2665\u2665\u2665\u2665t levels this game contains. I highly advies that you do not spend you money on this game, it is absolutely terrible. I guess that's why it is only 49 cents, should have been free. Gave me aids. I love using my blowtorch to cook up some LAMB SAUCE!!!!. Having Candlelight on the PS4 and loving it, the first game I got when I joined Steam was Candlelight. This game is very entertaining. If I had to describe it to something I've played before I would have to say a modern day Pitfall with a candle. The graphics are well put together. Some graphics are blocky like minecraft while other graphics are wisperly like the clouds. The lighting is fantastic blend to the game. I can see great effort was put into the graphics unlike most dev games you see. The play is fun, I had a great time playing the game. I then turned it up a notch and played through going as fast as I could with out dying in the levelV(next land). By doing this this made the game totally different an easy level became not so easy. I also could then understand how the developer created the level and how the level flowed which gave me even more respect for the game. The game has many lands and themes to the land. I really enjoyed the Raiders of the Lost Ark theme and Alice and Wonderland theme blew me away. I definately thought I got my money's worth, I payed full price on both platforms, ps4 and steam. I highly recommend this game, and if you do buy it then for each land go for the score that matters, 9900+ means you went balls fast and didn't die! get it!. Its basicly the same game as last year with some career tweaks and some track editor tweaks. They say they made it harder and more realistic however i feel they just made it hard to turn and you wreck ALOT on landings. Overall the game is ok. I personally will never be buying another one of these games. They are treating it like madden and releasing a new game every year with very small changes. For me this is not worth the money if you have supercross 1. very disappointed.

Whips are still very bad and not unlocked.

Terrain does not deform or even make ruts. Even on long and real thing.

Turning feels like you are turning a semi truck not a dirtbike.

character creator is very weak and lacking.

track editor is very weak and lacking.. Really good so far, nice feeling on the driving mechanics you can feel the difference with the terrain, loads, and technology upgrades, it's difficult to traverse sometimes but that just add to the realism. Great tech tree and interesting. I just encounter a small bug in the extraction mechanics but considering an early release it's above the average in terms of development. Great potential!!! be aware it's time consuming and at the begining it will be slow on the resourse gathering until you develop bases and technologies.
